Change in the V1→V1 like-to-like slope as axons are made incomplete
below 0 = rule looks stronger; bands: 95% paired bootstrap over presynaptic neurons
Synapses (Nsyn)
Synapses per contact (Nsyn / Ld)
Beyond distance, by cell type (Nsyn)
real 23P partial axons
RF-centre distance change in slope per 10°
Orientation difference change in slope per 10°
real − distance-matched shuffle
4P axons
23P axons
fraction of each axon's cable kept
radial truncation
random cable loss
random synapse subsample
radial, beyond cell-type shuffle
radial, beyond distance-matched shuffle
complete axons
radial f = 0.3
