Change in the V1→V1 like-to-like slope as axons are made incomplete
below 0 = rule looks stronger; bands: 95% paired bootstrap over presynaptic neurons
Synapses (Nsyn)
Synapses per contact (Nsyn / Ld)
Realistic incompleteness (Nsyn)
real 23P
partial axons
RF-centre distance change in slope per 10°
Orientation difference change in slope per 10°
fraction of each axon's cable kept
all
23P
4P
radial truncation
random cable loss
random synapse subsample
radial, beyond shuffled wiring
calibrated, predicted (pooled)
calibrated, predicted (cell type)
real partial − full axons
